

Definition Of Done

Definition of done is tied with different part of the development process { technical tasks, user stories, bugs}.

A project must have pass those rules DoD_Rules:

- 1- Tests are written and all tests are passed successfully without errors and warnings.
- 2- SW is reviewed.
- 3- SW is integrated with the master branch to be ready for release a new feature.
- 4- Documentation updated.
- 5- SW is Deployed on staging environment.

Definition Of Ready

It is a checklist of what needs to be done to a product backlog item in the next sprint before the team can start implementing it.

A project DoR :

- 1- Product owner and Development team need to have talked about the story at least once.
- 2- Story must have clear business value.
- 3- Effort need to be estimated.
- 4- Story must be broken down enough to fit a single sprint.
